PROFESSIONAL SUMMARY

Final-year Information Technology student with proven experience in building full-stack applications and cloud-based tools. Passionate about applying digital solutions in industrial settings through internal tooling, dashboards, and real-time data systems. Eager to learn high-demand skills in AI, ML, and automation to contribute to real-world use cases in smart manufacturing, cloud operations, or enterprise IT systems. Open to internships that blend development with AI/ML or industrial process digitization.

EDUCATION

B.E - Information Technology

(2022 – 2026)

R.M.D Sinhgad School of Engineering, Pune

PROJECTS

Kavira – Full E-Commerce Web Tool

(2025 – Present)

- Firebase-backed inventory & order system with real-time updates.
- Razorpay payment gateway with custom checkout and invoice handling.
- TailwindCSS-based UI with admin panel filters, customer data, and responsive layout.
- Mimics internal order dashboards commonly used in enterprise systems.

Link – kavira.vercel.app

Portfolio Website

(Dec 2024)

- Mobile-optimized portfolio showcasing tech stack and creative web components.
- Designed using semantic HTML5, TailwindCSS, and light/dark mode.

CERTIFICATIONS & TRAINING

Full-Stack Web Development Bootcamp (Dr. Angela Yu – Udemy)

(May 2025 – Present)

- Gaining hands-on experience in modern frontend development using HTML5, CSS3, JavaScript ES6, and DOM manipulation.
- Building and deploying full-stack projects and applications to the web using Vercel.

Microsoft Internship – Azure & Power Platform (at KasNet Technologies)

(Dec 2024 – Jan 2025)

- 6-week internship with exposure to cloud computing, AI services, and Power BI.
- Developed IT modules using Azure services and dashboarding tools.

IBM SkillsBuild – Enterprise-grade AI

(2024)

- Explored enterprise AI/ML use cases, data pipelines, and ethical design.

SKILLS

Languages & Frameworks: HTML, CSS, JavaScript (ES6+).

Frontend Tools: TailwindCSS.

Backend & Cloud: Firebase Realtime DB, REST APIs, Azure (basic), MongoDB (basic).

Tools: Git & GitHub, Razorpay, Vercel.

Focus Areas: Dashboard design, internal tooling, responsive UI, real-time systems.

Learning Interests: AI/ML, data pipelines, intelligent automation, IoT dashboarding.

EXPERIENCE

Freelance Web Developer (Remote)

(2024 – Present)

- Developed live web application (Kavira) with admin authentication and payment logic for a Real Client.
- Integrated Firebase DB with dynamic form inputs and visual data flows.
- Built components and interfaces that resemble internal dashboards used in B2B/industrial apps.
